

Four Ways to Make Momma Feel Sexy

Come on dads-to-be, admit it. You love your pregnant partner's new curves. She may not be too enthusiastic about them, but she can learn to love her evolving body with a little help from you, says Erica Neuman, sexual wellness expert for MyPleasure.com. Try the following to boost her self-image:

Compliment her: Tell her how much you love her new figure on a regular basis. Neuman suggests saying things like, "I love all your new curves. They make you look so sensual and sexy." Be specific and focus on the parts of her body that are changing, like her breasts, tummy and glowing skin.

Massage her: If your partner has a sore back, rub it. Even better, don't wait for her to ask. Nothing says, "I love your new body" like giving it significant hands-on attention, according to Neuman.

Pamper her: Show her how much you love her with a little foot affection. Invest in a pedicure kit and devote some time to her weary feet. Having painted toes is enough to make any woman feel a little sexier, Neuman says.

Capture her: Make the love of your life see herself through your eyes. Take a few photos while she's unaware or set up a professional photo shoot. Make sure the pictures focus on her growing tummy, and then display a few around the house. And keeping a photo in your office sends a loud and clear message that you find her irresistible and want to show her off. — BS
